

SMART Calls for SOS

Husna Hashim

2 June 2010. Sekolah Menengah Abdul Rahman Talib (SMART) Kuantan students were enlightened with a talk on Study Orientation Skills (SOS) delivered by Mohd Ghani Awang who is a CMLHS Senior lecturer from the Department of Human Sciences. It is from his extensive research that he created the Ghani Format (Format Ghani). Hence, the main objective of the talk was to discuss and utilise Ghani Format in science subjects to the fourth formers of the school. There were 120 students of science stream and 30 teachers took part in the process.

During the talk, various examples on the usefulness of Ghani Format was shared and further elucidated. The students went through an assessment, diagnostic and correctional processes that eventually led them towards a better understanding of the appropriate SOS using additional information from SOS portal as well as books related to SOS.

The outcome of the project was encouraging thus the principal of SMART recommended this particular format to be introduced to the fifth formers. In addition, a follow up project was conducted on July 7, 2010 to 120 SMART sixth formers and 30 teachers around Kuantan.

Mohd Ghani (*left*) watched the teacher helped the students to use SOS online materials.
